

ORGANIZATION PREPARING FOR BROADER MODERNIZATION

Industry: Enterprise / Regulated Environment

CLIENT OBJECTIVES

- Avoid rework before starting application modernization
- Ensure Kubernetes is ready to support future initiatives
- Reduce risk and time to value in later phases
- Maximize ROI from existing VCF and VKS investments

CHALLENGE

The organization wanted to modernize applications but recognized their Kubernetes foundation was not ready.

WHAT WE DID

- Confirmed readiness for a Two-sided Shift
- Framed the business and technical implications of modernization
- Built a production grade VKS foundation designed for future expansion

BUSINESS OUTCOMES DELIVERED

- Reduced risk for future modernization initiatives
- Avoided platform rework
- Faster time to value in later phases
- Long-term ROI from VCF and VKS investments

TWO-SIDED SHIFT STEPS

1. Readiness

2. Assess

3. Land
